MICROCHIP /SPAY/ NEUTER

Whether they're new or have been a part of your family for years, it's a good idea to have all of your pets microchipped and neutered!

A microchip is a permanent form of identification. Each chip has a unique ID number that will identify your pet as part of your family and allows for your pet to be reunited with you if ever lost!

**WHY TAKE THE RISK?
GET YOUR PET MICROCHIPPED**

Having your pet spayed/neutered has many benefits. It will decrease the likelihood of prostate cancer in males and mammary tumors in females. It eliminates the risk of testicular cancer in males and pyometra in females, as well as unwanted pregnancies.

Come in today to have your pet checked out!

It's not just rabbits who multiply like rabbits.

Spay or neuter your pets. Help stop pet overpopulation.
