

PARASITE PREVENTION MONTH

APRIL 1ST-30TH

FLEAS, TICKS, MOSQUITOS, AND INTESTIAL WORMS

How much do you know about these parasites and your pet's health?

Parasite prevention is an essential part of your pet's overall health. It's very common for your pet to become infected with internal or external parasites in his or her lifetime. Some parasites can be transferred from your pet to other members of your family! How gross!! Year round prevention is important to make sure your pet stays parasite free!

Aloha Animal Hospital tests for parasites every 6 months as part of a wellness exam!

THE GOAL

For the month of April we want to educate everyone on how to protect and prevent their pets against heartworms, fleas, ticks and internal parasites!

Visit us today to talk about what products we recommend!
